TUESDAY, JULY 14, 1885.

THE TELEGRAPHERS STRIKE AGITATION.

The Baltimore operators made a serious mistake when all the questions of the settlement were submitted and work set at a stipulated signal. In the memorial addressed to the companies saying both sides agreed that work on that signal should be resumed, and the Directors and the public were encouraged to the belief that a quick and easy opportunity would be given to readjust their differences. Instead, the owners of the Baltimore district up to the last one of the strikers and refuse to refer a consideration of work. It is also put forth as a fundamental principle of their organization that "there shall be no strike until an attempt shall have been made at arbitration." There was no attempt at arbitration in this case. It was not even suggested. The fundamental would have a much better standing before the country if at the time the strike was ordered a committee had been presented to the company following the original demand, and offering to refer the entire case to a committee of employes allowed to work, the companies and the customers should submit evidence and arguments.

It may be that the companies would have refused to submit such a proposition, but such a refusal on their part would have forfeited to the public mind great sympathy for a strike, and would have guaranteed to the companies the complete and all of the public. The action of the companies would have been sustained almost unanimously by the press. Resolutions would have been passed by the Boards of Trade, Business Exchanges, Societies, and other organizations representing the financial and commercial interests of the country asserting the principles of the companies and demanding the establishment of the companies. There would have been quite a pressure of public opinion to force all employes that the companies would have afforded to prolong the suspension of telegraph business in order to hold out against a fair and reasonable petition to arbitration of the differences between themselves and their employés.

Is it too late to arbitrate? It is true that the companies may now stand more justification for a refusal to submit their case of the matter to arbitration, but it is still possible for the companies to propose terms which the strikers could accept without the loss of their self-respect. If they should propose terms, fair, strong, to other men of the country, who would be slow to condemn the new, intelligently and unselfishly, without knowing and sympathizing with the companies, if the Baltimore operators should refuse to accept the terms offered by the companies, the public would be slow to condemn the companies for the withdrawal of the proposition. There would have been quite a pressure of public opinion to force all employes that the companies would have afforded to prolong the suspension of telegraph business in order to hold out against a fair and reasonable petition to arbitration of the differences between themselves and their employés.

THE COURTS.

The Proprietor of the West Side Street Railway.

In the Equity, the proprietor of the West Side Street Railway is still examined in the Sherman House against J. C. Haughey & Co., former contractors, to recover $5,000 damages. The counsel for Haughey & Co. are trying to show that the Railway Company has failed to perform a contract for him in that he did not have access to a turn-table, at Fulton & Green streets, for the turning of cars, as he claims he was promised by the Railway Company, the owners of that turn-table, which the Railway Company refused to allow him to use. Mr. Haughey testified that he had to build a turn-table at his own expense, and that it had become a total loss. Counsel for the Railway Company contend that the act of a third party, the owners of that turn-table, relieved the Railway Company from any responsibility in the matter. Mr. Haughey's counsel is to-day, with the testimony, Mr. Haughey's counsel is to-day, with the testimony, Mr. Haughey's counsel is to-day, with the testimony,
